

GROWING TOMORROW'S WORKFORCE LEADERS *TODAY*

Managers will walk away with...

A cohort of manager-level colleagues to continuously learn from

A new leader-focused mindset to apply to their role & daily lives

Confidence in managing their team's dynamics and performance

An understanding of important labor relations, human resources, and compliance policies

At the City of Boston, our goal is to empower our people to grow as leaders by making learning available, worthwhile, and a little fun for everyone.

The newly designed Leadership Summit for Managers (formerly the Manager Certification Program) provides a **three-day, virtual, collaborative experience** designed to grow managers into *people leaders*.

Managers who attend can expect to explore traits of successful managers, build crucial leadership and communication skills, and chart their course for leading the City's workforce.
